

Pinjin project acquisition: investor webinar invitation

WA-focused gold explorer, Kalgoorlie Gold Mining (ASX:KAL) ('KalGold' or 'the Company'), is pleased to invite interested parties to attend a webinar providing an overview of the recently acquired tenements at the Pinjin project, as well as the Company's capital raising activities which includes a \$1.4m institutional share placement and an ongoing Share Purchase Plan (SPP) to raise up to \$0.5 million¹.

The webinar will be held:

Date: Tuesday 30th May 2023

Time: 10am AWST / 12pm AEST

Registration: https://us02web.zoom.us/webinar/register/WN_oLN1zYmfTFGMoCJSpBbWng

Managing Director Dr Matt Painter will deliver a company presentation which details the total tenement package at Pinjin, which covers 285 km² over an Archean greenstone belt within a world-class gold precinct.

The Project includes the Kirgella Gift prospect which has delivered high-grade historical results, including 33m @ 3.10g/t from 51m downhole (KGRC004). Recent confirmatory drilling has further encountered encouraging mineralisation (Figure 1), with assay results pending.

Following the presentation, attendees will have the opportunity to ask questions directly to Dr Painter during a moderated Q&A session.

The event will be held via Zoom and a recorded copy of the webinar will be made available following the event on the Company's website at <https://www.kalgoldmining.com.au/>

About KalGold

Kalgoorlie Gold Mining (KalGold, ASX: KAL) is an ASX-listed resources company, with a large portfolio of West Australian projects, focussed on:

- The **Bulong Taurus Project**, 35km east of Kalgoorlie-Boulder, which offers opportunity for rapid conversion of new and historic drill results to JORC resources. The Taurus gold mining centre was discovered in the 1890s gold rush and has been almost continuously worked by prospectors since. KalGold is the first company in generations to assemble the full tenement package over the mining centre to fully and properly assess this highly mineralised area for significant gold deposits.
- The **Keith-Kilkenny** and **Laverton Tectonic Zone Projects**, which focus on overlooked areas of these highly prospective terranes. Broad areas containing nickel laterite deposits have not been assessed for gold in decades, and KalGold will initially focus on assaying archived samples from historic programs. Other areas contain recent prospector discoveries that have not been previously explored.
- Other projects, including the **Kalgoorlie Project**, that offer numerous conceptual targets that will be refined and tested through ongoing field and desktop programs.
